BACHELOR OF SCIENCE IN ARCHITECTURE

The Bachelor of Science in Architecture (B.S. Arch) offers a rigorous and distinguished architectural education profile for our students around technology in all areas – design, history, theory, and communication. It is defined by a knowledge of how to think about and apply technology in architecture. Our program offers flexibility in the design studio sequence to allow coordinated interdisciplinary work with other schools at Georgia Tech. We build our academic foundation on studio classes, history and theory, and a deliberate blend of technology and design. We offer incubator workshops to all our students, from Freshmen through Seniors, which allow them to follow their intellectual passions and hone indemand skills. Our students graduate with a broad-based undergraduate education grounded in design, science, and technology.

The Bachelor of Science in Architecture program prepares students for graduate-level studies in architecture, for graduate study in related fields, or a variety of careers related to architecture, the building industry, or government service.

Free Electives			
Free Electives		12	
Total Credit Hours		124	

Pass-fail only allowed for Free Electives.

¹ C minimum or higher

0--4:4

A cluster option of 11 hours of Architecture courses with a grade of 'C' or higher may be used in place of ARCH 4016 and ARCH 4017. See advisor for approval

International Plan

The International Plan (IP) in the School of Architecture is a challenging and coherent academic program for undergraduate students who will develop an introductory level of global competence within the study of architecture. The International Plan is an intensive degree-long program designed to prepare students with the ability to:

- assimilate comfortably in a constantly evolving international context within the profession of architecture,
- 2. value how architecture is practiced in different global contexts,
- 3. function effectively in a multi-national academic and work environment, and
- understand the complexity of the global economy and the importance of developing a sensibility to international relations.

While many students gain some exposure to these aspects of today's world through the patchwork of traditional international opportunities such as study abroad and international internships, IP is designed to develop a deeper level of competency in these areas within the study of architecture.

The requirements of IP are:

- 1. Proficiency in a Foreign Language
- 2. Globally Focused Courses

2 Bachelor of Science in Architecture

- 3. International Experience, and
- 4. A Capstone Course

IP students in the School or Architecture can fulfill the International Experience requirement of the International Plan by participation in a university-approved international program with the approval of the School of Architecture.

Undergraduate students in the School of Architecture must hold a minimum 2.5 GPA at the time of application to be eligible for the International Plan . Students must complete each architectural design studio with a grade of C or above in order to move forward in the sequence and maintain eligibility for IP. Students will not be allowed to study abroad until they have completed the first four foundational studios.

For more information on IP, visit www.arch.gatech.edu/international-education.
