DOCTOR OF PHILOSOPHY WITH A MAJOR IN BIOENGINEERING

The BioE Program is interdisciplinary in that it is not a standalone academic unit like most departments or schools at Georgia Tech. This interdisciplinary graduate program offers advanced courses in bioengineering, engineering specialties, and life sciences combined with training in cutting-edge bioengineering research. The BioEngineering PhD degree requires a thesis based on independent study of a bioengineering research topic under the guidance of a BioEngineering program faculty member. Bioengineering research focuses on the development of new or improved physical and mathematical concepts and techniques that may be applied to problems in medicine and biology, including the fundamental study of biological phenomena and development of new medical devices.

Eight different academic units from the Colleges of Engineering, Computing, and Design participate in the program. The BioE Program provides research opportunities for students with any participating program faculty, allowing tremendous diversity and flexibility for research topics and advisors.

All PhD programs must incorporate a standard set of Requirements for the Doctoral Degree.

Requirements for the Doctor of Philosophy with a major in Bioengineering

Code	Title	Credit Hours
Qualifying Exa	aminatin	
Teaching Prac	ticum	
Thesis Propos	sal	
PhD Dissertati	ion	
Coursework re	equirements	

PhD students in BioEngineering must complete course requirements with an average cumulative GPA of 3.2 or higher. PassFail hours not allowed.

Code Title Coursework Requirements	Credit Hours
Engineering Fundamentals	9
Biological Sciences	9
Engineering Mathematics	3
Technical Electives	12
Doctoral Minor	9
Total Credit Hours	42

Qualifying Exam

The qualifying exam is a 1.5 to 2 hour oral exam consisting of questioning from a committee of three BioEnginereing faculty. PhD students must take the qualifying exam after 3 academic semesters of residency (excluding summers), except those students entering with a master's degree must take the qualifying exam within 2 academic semesters. Students must have a GPA of 3.2 to take their qualifying exam. Students who do not pass the exam the first time have a second opportunity to take and pass the exam within the following 3 months.

Teaching practicum

The purpose of the practicum is to provide the student with training and experience in teaching a course. The student will work with a BioE faculty member on all aspects of teaching a course, including:

- delivering lectures or managing discussion sessions
- holding office hours
- helping to prepare and grade assignments

The instructing faculty member must attend the student's lectures and provide feedback.

PhD students must also satisfy any related home school requirements.

Thesis proposal

A student must provide a cohesive research plan addressing a significant problem and obtain input and approval from their thesis committee on the proposed research plan via an oral defense of their thesis proposal. The proposal should include a critical review of the relevant literature, a cohesive set of specific aims, hypothesis, and expected outcomes addressing thesis topic, and an appropriate research design and plan.

PhD Dissertation

-:...

....

A student must complete a searching and authoritative investigation of their chosen field, culminating in a written Thesis covering that investigation. An oral defense will be scheduled on the subject matter for the Thesis and the field in which it lies. The thesis defense examination will be conducted by the Doctoral Examination Committee chosen by the student and the thesis advisor and approved by the Graduate Studies Committee and the Dean of Graduate Studies.
