

MASTER OF SCIENCE IN GLOBAL DEVELOPMENT

The Master of Science in Global Development is a 12-month program designed to prepare professionals for sustainable development work in governments, private development firms, and NGOs. Students are exposed to not only the concerns of developing regions but also the issues facing the developed world in terms of sustainability and resilience. The program responds to the substantial challenges of rapid urbanization, climate change, and growing inequality in cities of developing regions and draws on concepts and skills from economics, politics, city and regional planning, and international affairs. Students will gain multidisciplinary knowledge and training needed to help address challenges in anything from infrastructure provision to poverty reductions.

Students take classes in Georgia Tech's School of City and Regional Planning, School of Economics, and Sam Nunn School of International Affairs.

Code	Title	Credit Hours
Core		
INTA/ECON 6704	Introduction to Global Development	3
INTA 6003	Empirical Research Methods	3
CP 6514	Introduction to Geographic Information Systems	3
One of the following:		3
